MEDICAL

# 640 Pediatric Examination Table

# Safe, secure care for **your** **most precious** **patients**

When caring for infants, moving the patient from one station to the next can create unnecessary discomfort and risk. That's why we designed the Midmark® 640 Pediatric Examination Table to weigh, measure and examine infants in one safe, secure location. Because at Midmark, we believe that who's using our equipment is every bit as important as how and why it's being used.

# Weigh, measure and examine infants **safely** and **securely**

The Midmark® 640 is designed with features that can help you weigh, measure and examine infant patients safely, accurately and efficiently. Press the Zero/On button and within seconds the scale display will read, "Scale ready." Place the infant on the scale and the weight will automatically display. When you want to measure the patient, simply pull out the infantometer, then slide it back into place when finished.

**01 Rereigh** allows you to recapture weight with the press of a button—no need to pick the infant back up.

**02 A surface height of 36 inches** provides easy access and reduces the need for repeated bending during the exam.

**03 Upholstered end panels, beveled sides and flat surfaces with no sharp edges** help ensure patient safety.

**04** For storage needs, there is an **oversized drawer** as well as a **bulk storage area** designed for keeping diapers and equipment.

**05 A hidden paper roll holder** with a paper tear strap at one end adds convenience.

**06 The built-in scale** measures in pounds or kilograms with unit lock to help ensure consistency and automatically shuts off after 30 seconds to conserve energy.
