BD SafetyGlide™ Needles and Syringes

Safety Without Compromise

Setting the standard in safety for a wide variety of applications.

The most versatile safety injection technology available today.

- Features single-handed activation that allows for ease of use and minimal training.
- Low profile safety mechanism remains discretely out of the way before and during injection and requires minimal change in technique.
- Activation-Assist™ technology minimizes finger motion required for activation and keeps fingers behind the needle tip.
- Stainless-steel housing securely shields the needle tip after activation.
- Bevel-up design facilitates ease of injection. Safety-arm is positioned for optimum visualization of injection site.
- Available in a full array of sizes.
- Compatible with any size conventional syringe.

BD SafetyGlide™ Needles and Syringes

Prior to activation

After activation

Stainless steel latch securely shields needle tip after activation.

BD SafetyGlide™ Needles

BD SafetyGlide™ Syringe

Safety In Small Doses

Completes the SafetyGlide line to meet your Subcutaneous and Intradermal injection needs.

Available in three small syringe sizes—1 mL, 1/2 mL and 3/10 mL.

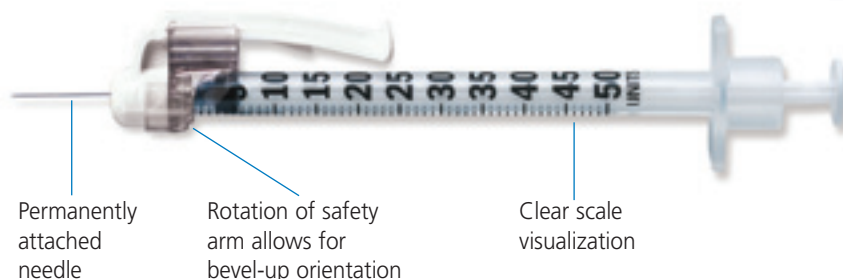

- 26 GA to 31 GA needle sizes perform a variety of subcutaneous and intradermal applications.
- 1 mL, 1/2 mL and 3/10 mL insulin syringe sizes facilitate small dose injections.
- Permanently attached needle means minimal waste space:
 - A necessity for insulin injection.
 - A potential medication cost savings if used instead of a detachable needle and syringe.
- Features single-handed activation that allows for ease of use and minimal training.
- Rotating safety arm eliminates interference with scale during drawing up, and facilitates low-angle injections.
- Cap is designed to stand on end for true one-handed passive recapping of clean needles for transport.

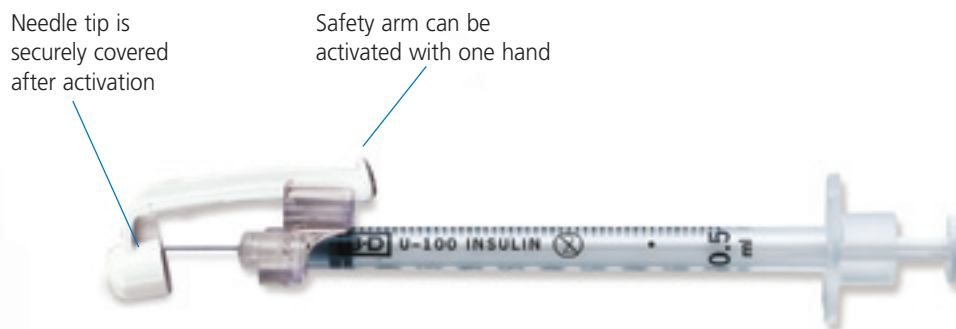

BD SafetyGlide™ Syringe

for Insulin, TB or Allergy

Prior to activation

After activation

BD SafetyGlide Needles with Syringes for Insulin, TB or Allergy

PROD #	DESCRIPTION	PACKAGING
305930	1 mL Insulin Syringe with 29 GA x 1/2 in. Needle	100/Box 400/Case
305932	1/2 mL Insulin Syringe with 29 GA x 1/2 in. Needle	100/Box 400/Case
305934	1/2 mL Insulin Syringe with 30 GA x 5/16 in. Needle - Thinwall	100/Box 400/Case
305935	3/10 mL Insulin Syringe with 29 GA x 1/2 in. Needle	100/Box 400/Case
305937	3/10 mL Insulin Syringe with 31 GA x 5/16 in. Needle - Thinwall	100/Box 400/Case

305946	1 mL Tuberculin Syringe with 26 GA x 3/8 in. Needle (ID)	100/Box 400/Case
305950	Allergist Tray: 1 mL Syringe with 27 GA x 1/2 in. Needle (RB)	25/Tray 1000/Case
305951	Allergist Tray: 1 mL Syringe with 26 GA x 3/8 in. Needle (ID)	25/Tray 1000/Case

(RB) = Regular bevel
(ID) = Intradermal bevel

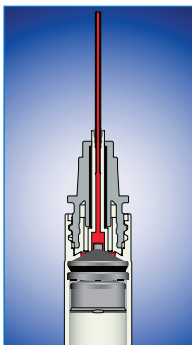

Shaping the Future of Safety

The latest innovation in retracting technology.

The only retracting syringe that truly meets your clinical needs.

- It's the first spring-based retracting syringe with a detachable needle! Allows the clinician to change needles for aspiration and administration.
- The BD Integra™ Syringe has extremely low waste space. Low waste space reduces medication waste and cost.¹

Red area = waste space

The BD Integra Syringe has up to 86% less waste space than other manufacturers' syringe designs.

- The clinician decides when to activate the retracting mechanism either before or after needle is withdrawn from patient.
- The low waste space design means there is minimal splatter after activation.
- Available in a wide range of needle gauges for use with 3mL syringes for Intramuscular, Subcutaneous and Intradermal injections.

Visit www.bd.com/Integra for more information.

¹ Data on file.
Texas childrens white paper: Recent studies show that Integra can obtain more doses from multi-dose vials of flu vaccine.

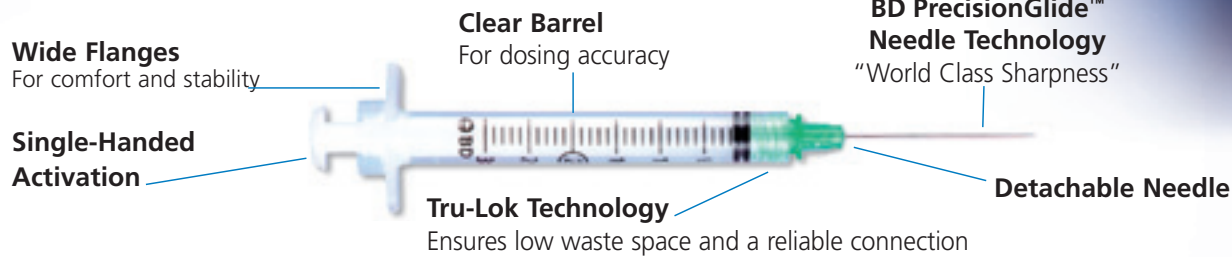

BD Integra™

With Retracting BD PrecisionGlide™ Needle

Prior to activation

After activation

Needle Retracts into the Syringe!
– Eliminates exposure to the needle after activation

BD Integra™ 3 mL Syringe with Detachable Needle

The BD Integra™ Syringe with detachable needle provides the benefit of low waste space, which is important in reducing medication waste and costs.

PROD #	DESCRIPTION	PACKAGING
305269	3 mL Syringe with Detachable 25 GA x 5/8 in. Needle	100/box, 400/case
305270	3 mL Syringe with Detachable 25 GA x 1 in. Needle	100/box, 400/case
305271	3 mL Syringe with Detachable 23 GA x 1 in. Needle	100/box, 400/case

PROD #	DESCRIPTION	PACKAGING
305283	3 mL Syringe Only	100/box, 400/case

BD Eclipse™ Injection Needle

Safety Made Simple

Intuitive and easy to use —
a highly economical
approach to safety.

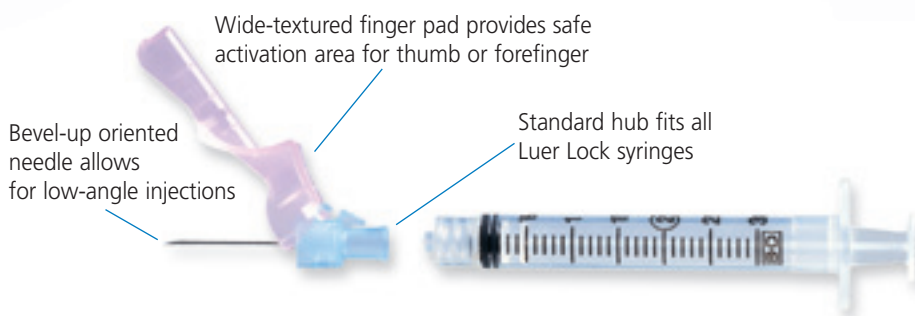

The same technology for both skin injection and blood collection.

- Activates with a single finger stroke immediately after injection—no hard surface is required.
- Bevel-up design facilitates ease of injection. Safety-arm is positioned for optimum visualization of injection site.
- Wide, textured finger pad provides safe activation area for thumb or forefinger.

BD Eclipse™

Prior to activation

After activation

BD Eclipse™ Needles

With this single-handed, needle-based safety-engineered injection device, BD offers one technology for both injection and blood-collection applications. The needle is bevel-up oriented to the safety cover to facilitate low-angle injections.

BD Safety-Lok™ Syringe

First In Safety

The world's first safety-engineered syringe.

Proven performance and dependability.

- The only device of its kind to provide color-coded visual confirmation of the safety lock.
- Protective sleeve locks into position with one motion to cover the needle after injection.
- Crystal-clear barrel and sleeve allows for dosing visualization.
- Large flanges and tapered plunger rod increase control for easier aspiration and injection.
- Interim "park" position of safety shield complements injection practice in the OR.
- Can be used with any needle 1-1/2 in. or shorter – providing safety for many sizes that do not have other alternatives.
- Available in a wide array of sizes—1 mL, 3 mL, 5 mL and 10 mL.

BD Safety-Lok™ Syringe

Prior to activation

Large Flanges and Tapered Plunger Rod increase control for easier aspiration and injection

Crystal Clear Barrel and Sleeve make syringe contents easier to see

Bold Scale Markings facilitate accurate dose measurement

World Class Sharpness for patient comfort

After activation

Visual Lock Indicator
Lock confirmed when green band fully covers red collar
(Also hear and feel the "lock")

BD Safety-Lok™ Syringe

The only safety-engineered syringe of its type to offer clear visual confirmation of the lock position.

Pharmacy Products

BD™ Filter Needles

BD Filter Needles feature a molded-in 5 Micron filter membrane to reduce the risk of aspirating glass particles when preparing medications from ampoules.

PROD #	DESCRIPTION	PACKAGING
305200	19 GA x 1 1/2 in., Thin Wall 5 Micron filter	100/box, 1000/case
305201	18 GA x 1 1/2 in., Thin Wall 5 Micron filter with BD Nokor™ point	100/box, 1000/case

BD Nokor™ Vented Needles

The BD Nokor needle design features a cannula side port to place fluid on the side wall of a container during reconstitution. Some drug manufacturers recommend this to help reduce foaming or spray of powdered medication.

- BD Nokor design eliminates clogged cannula, retaining venting capability
- Vented needles available, designed to reduce internal container pressure

PROD #	DESCRIPTION	PACKAGING
305213	16 GA x 1 in., Thin Wall Non-Coring Vented Needle	100/box, 1000/case
305214	18 GA x 1 in., Thin Wall Non-Coring Vented Needle	100/box, 1000/case

BD Nokor™ Admix Needles

PROD #	DESCRIPTION	PACKAGING
305216	16 GA x 1 in. Admix non-coring Needle with thin wall	100/box, 1000/case

BD™ Sterile Syringe Convenience Trays

Efficiency for batch filling. With features like a stopper at the bottom-most position to reduce manipulation, BD Sterile Syringe Convenience Trays help pharmacy staff save time and effort when batch-preparing syringes.

PROD #	DESCRIPTION	PACKAGING
309701	1 mL Syringe, BD Luer-Slip™ Tip	25/tray, 12 trays/case of 300
309702	3 mL Syringe, BD Luer-Lok™ Tip	25/tray, 12 trays/case of 300
309703	5 mL Syringe, BD Luer-Lok™ Tip	25/tray, 12 trays/case of 300
309605	10 mL Syringe, BD Luer-Lok™ Tip	20/tray, 12 trays/case of 240
305617	20 mL Syringe, BD Luer-Lok™ Tip	10/tray, 12 trays/case of 120
305618	30 mL Syringe, BD Luer-Lok™ Tip	10/tray, 12 trays/case of 120
309680	60 mL Syringe, BD Luer-Lok™ Tip	20/tray, 6 trays/case of 120

BD Tip Caps

PROD #	DESCRIPTION	PACKAGING
308341	Luer Tip Cap Trays	10/tray, 200 trays, 2000/case
305819	Syringe Tip Cap	200/box, 2000/case

BD Oral Syringe System

Recommended for oral medications for patient safety. BD offers a broad range of syringes and accessories for oral medication administration. Both clear and amber syringes feature mL and teaspoon scale markings for accuracy. The amber syringes meet USP requirements for photo-sensitive medications.

PROD #	DESCRIPTION	PACKAGING
305217	1 mL Syringe, Clear with Tip Cap	100/box, 500/case
305220	3 mL Syringe, Clear with Tip Cap	100/box, 500/case
305218	5 mL Syringe, Clear with Tip Cap	100/box, 500/case
305219	10 mL Syringe, Clear with Tip Cap	100/box, 500/case
305207	1 mL Syringe, Amber with Tip Cap	100/box, 500/case
305210	3 mL Syringe, Amber with Tip Cap	100/box, 500/case
305208	5 mL Syringe, Amber with Tip Cap	100/box, 500/case
305209	10 mL Syringe, Amber with Tip Cap	100/box, 500/case

BD Tamper-Tuf™ Medication Containers

BD Tamper-Tuf containers are offered in two sizes (15 mL or 30 mL) providing extra convenience with a large filling port, snap-top and volume markings. The containers are available unassembled for non-liquid and liquid oral medication or assembled for liquid medication.

PROD #	DESCRIPTION	PACKAGING
305203	15 mL Container, Assembled	250/case
305204	30 mL Container, Assembled	250/case
305205	15 mL Container, Unassembled	250/case
305206	30 mL Container, Unassembled	250/case

BD Cornwall™ Disposable Syringe System

Comfortable, convenient fluid dispensing. The BD Cornwall Disposable Syringe System offers a user-friendly design for fluid transfer – without the capital investment required for filling pumps. Optional syringe-filling connectors allow fluid transfer to a wide variety of reservoirs, including vials, syringes and oral medication containers.

PROD #	DESCRIPTION	PACKAGING
305224	10 mL Fluid BD Cornwall Disposable Syringe	10/case
305225	Syringe Tip Connector	50/case
305223	Oral Syringe Tip Connector	50/case

BD™ Insulin Syringes

3/10 mL BD Lo-Dose™ Insulin Syringe with Permanently Attached Needle

PROD #	DESCRIPTION	PACKAGING
309300	28 GA x 1/2 in U-100 BD Micro-Fine™ IV	Self-Contained, 10ea/bag, 200/box, 1,600/case
309301	29 GA x 1/2 in U-100 BD Ultra-Fine™	Self-Contained, 10ea/bag, 200/box, 1,600/case

1/2 mL BD Lo-Dose Insulin Syringe with Permanently Attached Needle

PROD #	DESCRIPTION	PACKAGING
329461	28 GA x 1/2 in U-100 BD Micro-Fine IV (Orange)	Blister, 100/box, 500/case
309305	28 GA x 1/2 in U-100 BD Micro-Fine IV (Orange)	200/box, 1,600/case
309306	29 GA x 1/2 in U-100 BD Ultra-Fine	200/box, 1,600/case

1 mL BD Insulin Syringe with Permanently Attached Needle

PROD #	DESCRIPTION	PACKAGING
309309	28 GA x 1/2 in U-100 BD Micro-Fine IV (Orange)	Self-Contained, 200/box, 1,600/case
309311	29 GA x 1/2 in U-100 BD Ultra-Fine	Self-Contained, 200/box, 1,600/case
329424	28 GA x 1/2 in U-100 BD Micro-Fine IV (Orange)	Blister, 100/box, 500/case
329420	28 GA x 1/2 in U-100 BD Micro-Fine IV Single unit Gradation	Blister, 100/box, 500/case

1 mL BD Insulin Syringe with Detachable Needle

PROD #	DESCRIPTION	PACKAGING
329651	25 GA x 5/8 in U-100 (Orange/Blue)	Blister, 100/box, 800/case
329652	26 GA x 1/2 in U-100 (Orange/Tan)	Blister, 100/box, 800/case
329622	25 GA x 1 in U-100 (Orange/Blue)	Blister, 100/box, 800/case

1 mL BD Insulin Syringe Only

PROD #	DESCRIPTION	PACKAGING
329650	U-100 Slip Tip (Orange)	Blister, 100/box, 800/case
309629	U-100 Luer Lock	Blister, 100/box, 800/case

Infusion Therapy Devices

BD Nexiva™ Closed IV Catheter System

Taking subtle cues from nature, we've developed the profoundly simple, yet radically advanced BD Nexiva™ Closed IV Catheter System. The first of its kind, this all-in-one system is designed to reduce insertion attempts increasing first-stick success, as well as reduce your exposure to blood through the innovative blood-containment system. Having an all-in-one system decreases your exposure to blood and the potential risk of contamination.

BD Nexiva™ Closed IV Catheter System

BD Nexiva™ Closed IV Catheter System—Single Port

BD Instaflash™ Needle Technology

Designed to reduce hit-and-miss insertion by confirming vessel entry, enabling you to stay focused on the insertion site.

Built-in Stabilization Platform

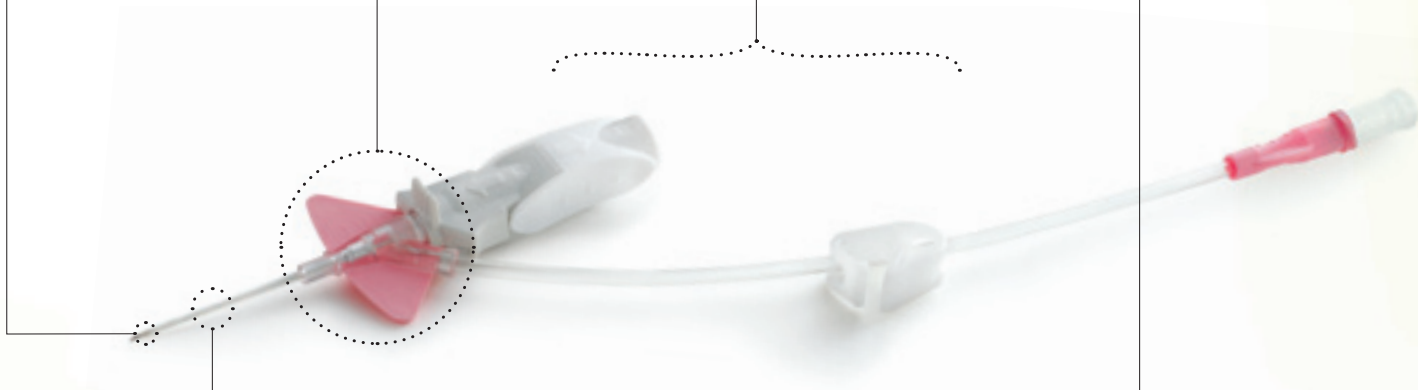

The built-in stabilization platform is soft and flexible, and is designed to help minimize catheter movement in the vessel, which may improve catheter dwell time.

All-in-One Closed System

The pre-assembled system creates a closed fluid path, designed to minimize blood leakage from the catheter hub, and minimize the potential for contamination and exposure to blood. The system is also capable of withstanding power injections for contrast-enhanced CT scans.¹

BD Vialon™ Biomaterial

Clinically-proven BD Vialon biomaterial has longer indwell times and softens up to 70% in the vessel, reducing the chance of mechanical phlebitis by up to 50%.^{1,2}

BD Insyte™ Autoguard™ Shielded IV Catheters

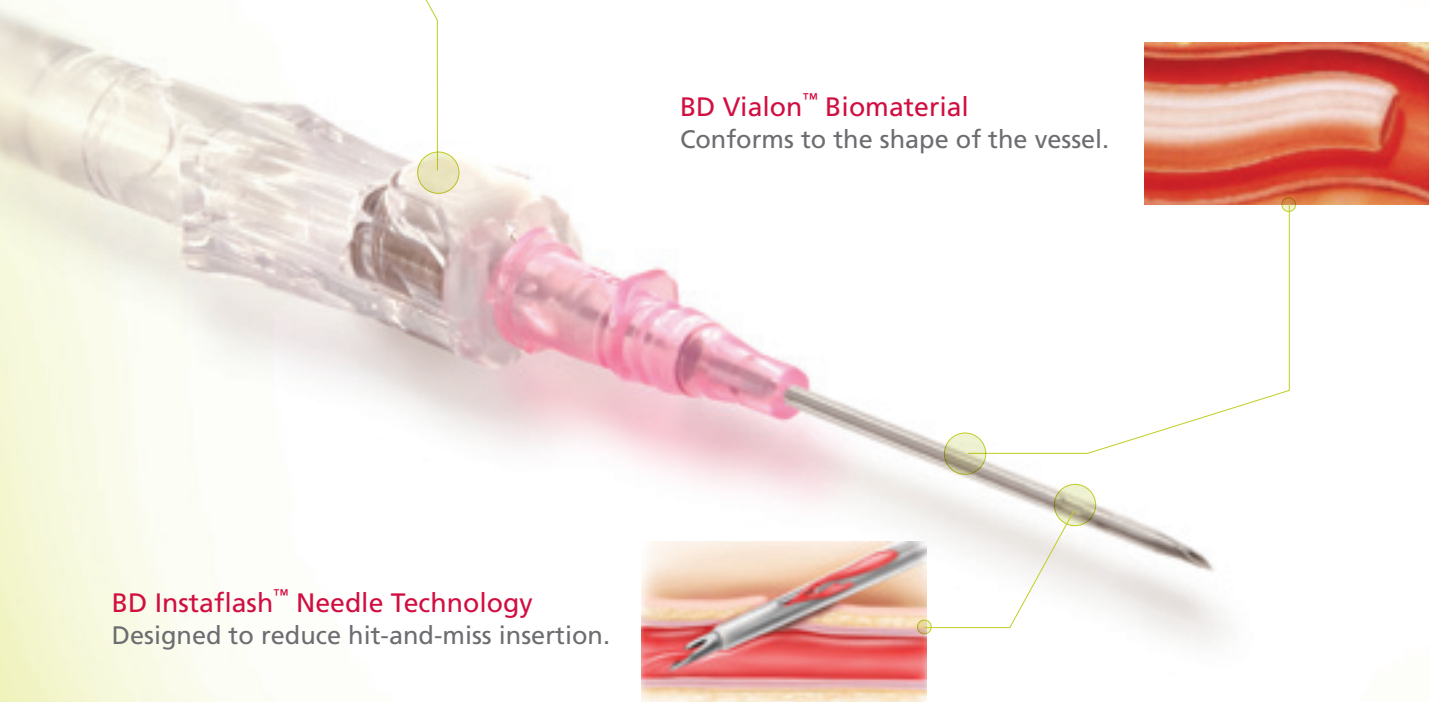

If I can get the first stick,
everything else will follow.

Reduces Needlestick Injuries

BD Insyte Autoguard shielded IV catheters mean added safety for you. The BD Insyte Autoguard push-button needle shielding technology was proven to effectively safeguard healthcare workers, with a 95% reduction in needlestick injuries.¹

Protection Is In Your Control

Push-button needle protection gives clinicians more flexibility with the catheter, providing control of when to activate the safety mechanism. According to a clinical study, this push-button needle shielding technology has significantly reduced needlestick injuries to healthcare workers.¹

BD Vialon™ Biomaterial
Conforms to the shape of the vessel.

BD Instaflash™ Needle Technology
Designed to reduce hit-and-miss insertion.

Preliminary Evaluation of a Safety IV catheter (Insyte Autoguard, Becton Dickinson) using the Centers for Disease Control and Prevention (CDC) National Surveillance System for Hospital Healthcare workers Database. Abstr. *Centers for Disease Control and Prevention - 4th Decennial International Conference on Nosocomial and Healthcare-Associated Infections*, March 2000."

Safety-Engineered Infusion Therapy Devices

BD Insyte™ Autoguard™ Shielded IV Catheter

BD Insyte™ Autoguard™ Shielded IV Catheters mean added safety for you. A study showed that one hospital reduced its needlestick injuries by 95% by switching to BD Autoguard™ Shielding Technology. The unique BD Instaflash™ Needle Technology in the 20, 22, and 24 gauge sizes provides immediate confirmation of vessel entry along the catheter shaft. Made of clinically proven BD Vialon™ Biomaterial.

Infusion Therapy Devices

All BD™ IV Catheters incorporate the sharp BD™ Needle Technology and a tapered catheter tip to facilitate penetration and insertion. Gauge sizes are colour coded for easy identification. BD Instaflash™ Needle Technology provides immediate visual confirmation of vessel entry and is designed to enhance first-stick success. Available in 24, 22, and 20 gauge sizes.

BD Vialon™ Biomaterial

Clinically Superior

BD Insyte™ and BD Insyte-N™ IV Catheters are made with BD Vialon™ Biomaterial, clinically proven to¹:

- Increase the ease of penetration
- Reduce splitting and peelback
- Resist kinking
- Reduce the risk of phlebitis by up to 50%
- Reduce the risk of catheter-related complications
- Increase indwelling times

BD Insyte-N™ IV Catheters are recommended for access to small or compromised veins. The broad line of BD Angiocath™ IV Catheters features inert FEP polymer material with high lubricity for easy insertion.

BD PosiFlush™ Syringes

Designed To Meet Your Needs

▶ BD PosiFlush™ Syringes are designed to:

Improve patient outcomes

Unique Syringe Design

- Designed to eliminate syringe-induced blood reflux*
- Designed to prevent solution from entering a non-sterile area of the syringe

Reduce the risk of medication errors

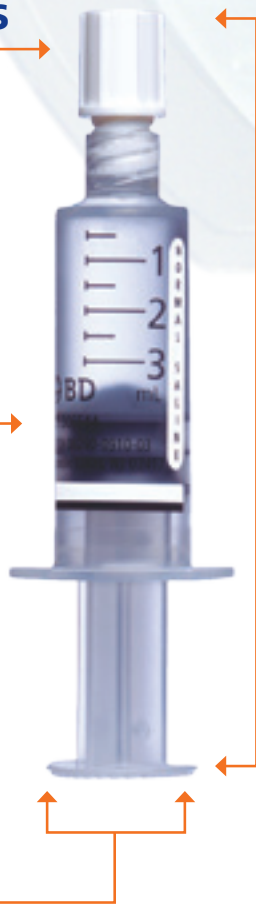

Clear Labeling

- Greater visibility of syringe contents
- Bold print for clarity
- Colour and bar coded for easy identification and verification

Reduce the risk of catheter damage

Standard 10 mL Syringe Diameter

- Generates significantly lower pressure (PSI) compared to standard 3 mL syringes
- All sizes comply with PICC manufacturer flushing recommendations

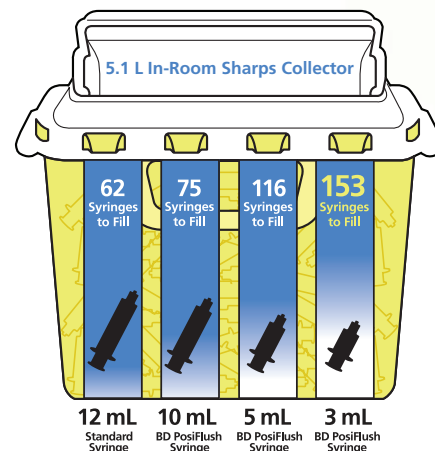

Reduce waste and costs

Stubby Syringe Profile

Selecting smaller size syringes (3, 5 mL) for peripheral lines:

- Reduces storage and disposal costs
- Minimizes environmental waste

*This graphic demonstrates the number of syringes that it takes to fill a sharps container. Data shows that you can fit more than twice as many BD PosiFlush 3 mL size syringes into a 5.1 L In-Room Sharps Collector as you can by using a standard 12 mL syringe!***

*Average reflux as measured in 4Fr PICC; data on file at BD.

**Data on file at BD.

BD PosiFlush™ syringes containing 0.9% sodium chloride.

BD Q-Syte™ Luer Access Split Septum

Advanced design plus proven material create the ultimate performance in closed luer access

The BD Q-Syte™ Closed Luer Access Device is a testament to the power of simplicity. Its minimal design offers maximum benefits, including the highest flow rates, exceptional reliability, and evident cleanability.

- **Extremely reliable**
- **Unrestricted flow**
- **Crystal clear visibility**
- **Simple to clean, access and connect**

BD Twinpak™ Dual Cannula Device

The BD Twinpak™ Dual Cannula is a truly universal device that simplifies needless IV access. It offers twice the performance of traditional methods. The BD™ Twinpak Device features two cannulas in one shield: one red hub, steel cannula for syringe filling and one clear, blunt plastic cannula for safe access into a split septum. The BD Twinpak™ Device helps to streamline IV work-flow practices by reducing the number of components required to perform IV push and flush protocols, thereby saving time and reducing costs.

Surgical Products

BD Bard-Parker™ Protected Blade System

Protect yourself.
Protect your staff...
in the OR.

Protection Without Compromise

The BD Bard-Parker™ Protected Blade System has been designed with the weight and feel that clinicians prefer, with convenient and easy one-handed activation of the protective shield. The blade remains covered during both assembly and disposal to help prevent accidental contact with the blade.

Get a lock on safety

The system offers a unique locking shield that provides easy activation:

- Clear shield locks before and after use for protection
- Top activation button enables left and right-handed use
- Audible button click and tactile sensation confirm lock is in place
- Blade assembly and disassembly are quick and easy, no extra steps

No compromise to technique

The system provides all the quality you've come to expect from BD Bard-Parker™:

- BD Bard-Parker™ Stainless-Steel Blade
- Stainless-steel handle with conventional weight and feel
- Durable handle design for extended life

BD Bard-Parker™ Protected Disposable Scalpel

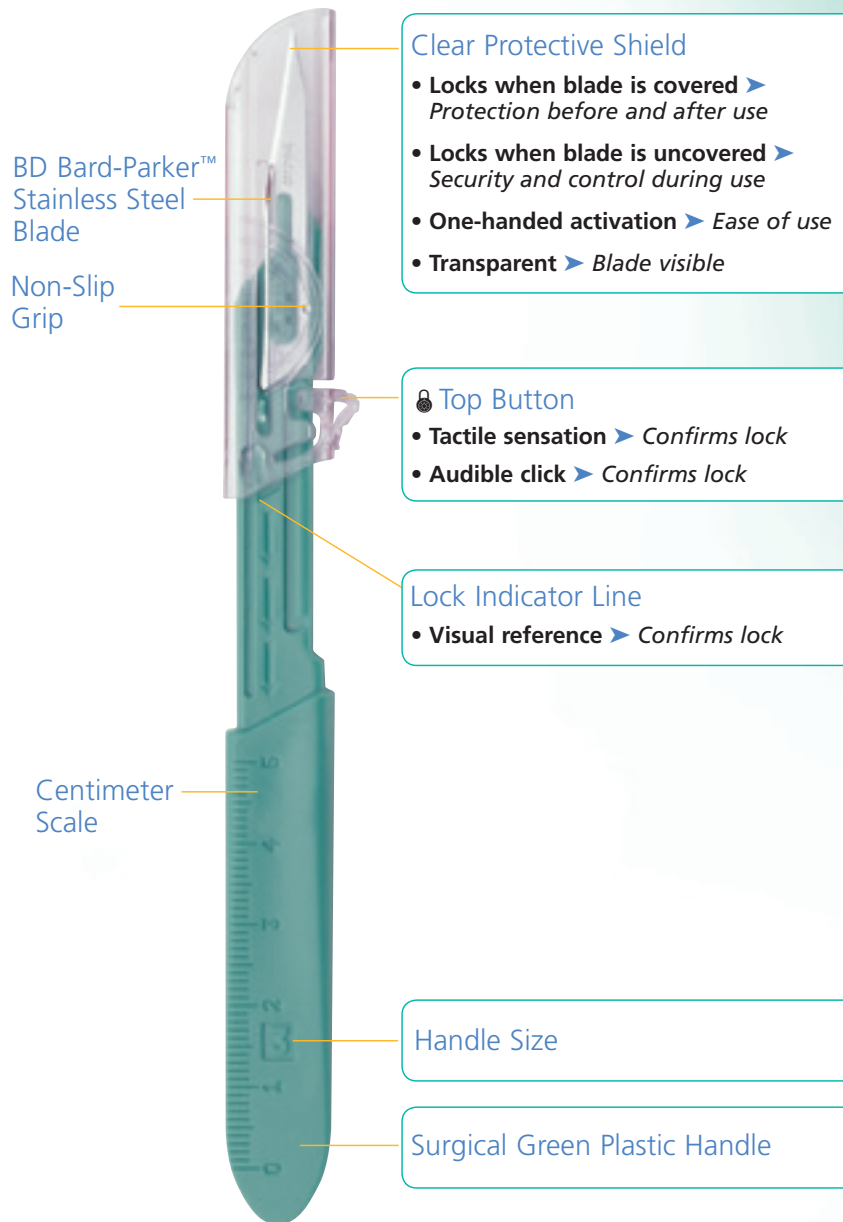

Featuring Locking Retractable Shield

Protect Yourself. Protect Your Staff. Designed to minimize the risk of surgical blade injuries, the BD Bard-Parker™ Protected Disposable Scalpel gives clinicians, throughout the hospital...

Protection Without Compromise

- In Procedure:**
 Permitting clinicians to focus first on the surgical site, rather than on the instrument.
- In Handling:**
 Providing instrument characteristics of weight, handling, and feel that clinicians prefer.
- In Technique:**
 Allowing clinicians to retract the protective shield, easily and safely with one hand.
- In Reliability:**
 Assuring quality and performance you have come to expect from the BD Bard-Parker™ brand.

Anesthesia Trays

BD™ Spinal Trays

Precision Components

- Your choice of spinal needle:
- BD™ Whitacre High-flow Pencil Point
- Pencil point is designed to spread the dural fibers and help reduce post-dural puncture headaches (PDPH)

OR

BD™ Quincke Spinal Needle

- Key/slot arrangement of stylet and cannula hubs facilitates proper needle bevel orientation. Precision-formed side hole
- BD™ Hypodermic Needle
- BD Luer-Lok™ (latex free) Syringe

All Trays Contain:

- BD™ Filter Needle (5 micron), blunt tip 18 GA x 1.5 in.
- Prep section including towel, swab sticks and gauze pads
- Fenestrated drape (blue paper or clear plastic)
- Sharps stick pad

Anesthesia Trays

BD™ Anesthesia Safety Trays

Premium Trays

- Spinal and epidural trays with safety engineered devices
- Standard and customized trays available

Precision Components

- BD SafetyGlide™ shielding hypodermic needle allows you to shield the needle immediately after use to reduce the potential of accidental needlesticks
- BD SafetyGlide™ needle securely attaches to any standard syringe
- Point-Lok® device lets you cover needle tips after use; but, prior to disposal, requires only a single-handed, single-step operation

Point-Lok® sharps safety device for your safety

- Place Point-Lok® device on flat surface, insert tip of used sharps device and press down. The sharp is now locked in the device.

BD SafetyGlide™ shielding hypodermic needle for your safety

- Activation-Assist™ technology for fast, easy needle tip shielding
- Single-handed activation
- Stainless steel latch securely shields needle tip after activation to reduce the potential of accidental needlesticks

Sharps Collectors

Sharps Collectors – Chemotherapy

Chemotherapy

Chemotherapy Sharps Collectors feature a wide entry port design for disposal of bulky chemotherapy waste. In addition, these collectors are designed to offer increased leak resistance.

Features:

- Point-first disposal
- Wide entry port for disposal of bulky chemotherapy waste items
- Exclusive safety plug for temporary closure
- Single-piece molding – no assembly required
- Sturdy puncture-resistant construction
- Attached locking lid for secure closure and handles for safe transport
- Not autoclaveable

Sharps Collectors – Extra Large

Extra Large

These stackable and sturdy sharps collectors feature large openings for bulky medical waste.

Features:

- Large access openings for up to 10 inch diameter medical waste
- Temporary and permanent closures
- Sturdy puncture-resistant construction
- Nesting for efficient storage
- Built in handles for easy handling and disposal

Extra Large

Phlebotomy

Clear top provides visualization of collector fill-levels. Increased fill-level identification helps prevent collector OVER-FILL...a leading cause of disposal injuries.

Features:

- Strong and durable puncture resistant construction
- Two-way safety slot securely grips needle hub and permits smooth, one-handed needle removal
- Temporary and permanent closures allow for safer transport and reduced risk of tampering and accidental needlesticks
- Larger all purpose opening permits disposal of bulkier medical wastes, such as swabs and needle holders

Sharps Collectors – Point-of-use

Point-of-use

One-hand, one-step technique... they feature a counter-balanced door. Container provides security against tampering.¹

Features:

- Counterbalanced door returns automatically for one hand, one step disposal
- Counterbalanced door stays shut to deter overfilling
- Safety transport handle
- Sturdy puncture-resistant construction

Sharps Collectors – One-Piece

One-Piece

Convenient, vertical “point first” drop, these robust sharps collectors are preassembled and offer a patented one-way funnel valve to minimize needlesticks and overfilling.

Features

- Point-first disposal
- One-way tamper resistant entry
- Secure cap closure
- Single piece molding – no assembly required
- Sturdy puncture-resistant construction
- Attached locking lid for secure closure and safe transport

Sharps Collectors – Nestable

Nestable

With an exclusive funnel-shaped opening and safety neck, these sharps collectors are nestable for easy storage. They allow point-first drop and reduce the risk of tampering and spilling.

Features

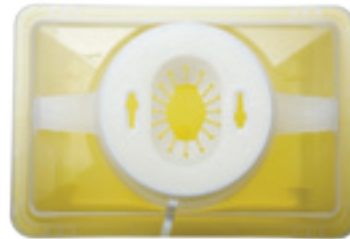

- Clear top helps deter overfilling
- Point-first disposal
- One-way tamper resistant entry and safety neck
- Nestable for efficient storage
- Sturdy carrying handles
- Sturdy puncture-resistant construction
- Secure cap closure for safe transport
