

Cardiology Products

COVIDIEN: Your solution for cardiology monitoring supplies.

WHY COVIDIEN CARDIOLOGY MONITORING SUPPLIES?

Covidien is a market leader in monitoring, diagnostic, defibrillation and neonatal electrodes. With over 20 years of hydrogel experience, Covidien's gel formulas provide accurate traces. In addition, the lower chloride content in Covidien's hydrogels help to minimize skin irritation. With products varying in size, shape and substrate, Covidien has an electrode to address all clinical needs.

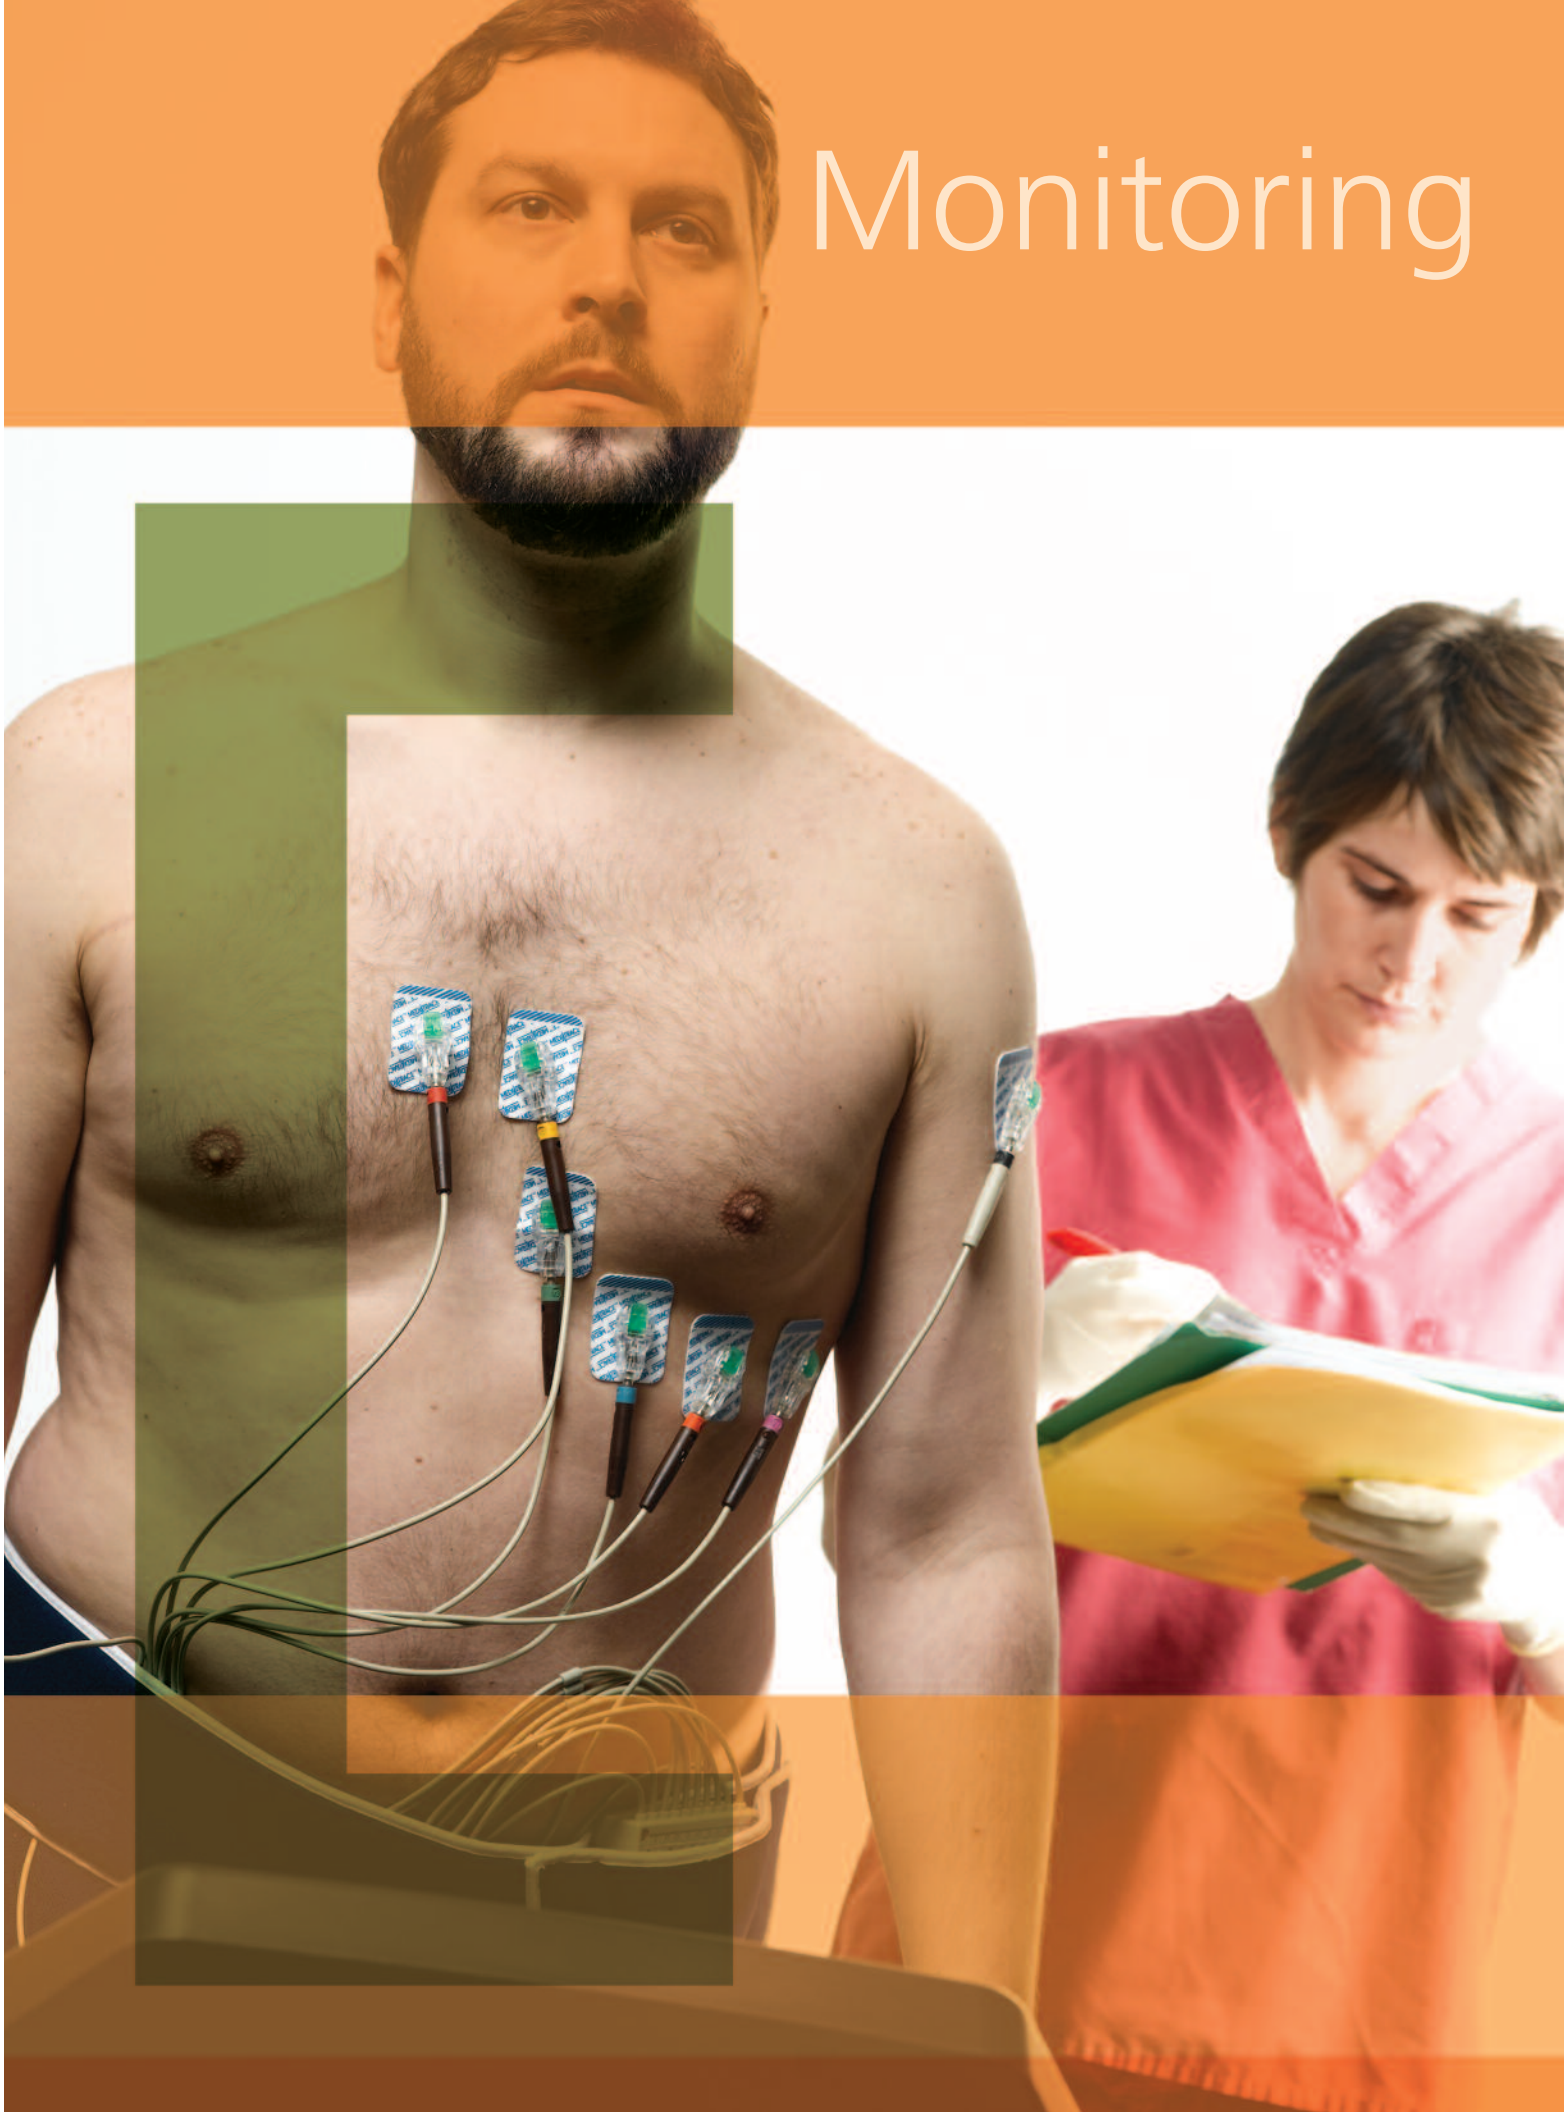

For over 50 years Covidien has also been a market leader in the recording chart paper market. Rounding out the complete cardiology solution is our extensive offering of cables and leadwires.

From patient to monitor you only need one supplier for your Cardiology Monitoring supplies: Covidien.

Covidien has a direct U.S. sales force of over 150 service-driven professionals focused on Cardiology monitoring supplies in both the Acute Care and Alternate Site markets. These individuals are located in every major metropolitan area of the country to support our customer's needs. In addition, we have product distribution centers strategically located throughout the U.S. in order to assure our customers of the shortest transit time possible when placing orders. Our products are also available through all major medical/surgical distributors.

Monitoring

FOAM ELECTRODES

- Repel fluids to maximize adhesion
- Conductive adhesive hydrogels for excellent adhesion and clear, reliable tracings
- Courtesy lift tab for easy placement and removal that may also be used for additional product adhesion/anchoring
- Multiple packaging options available
- Latex free, DEHP free, mercury free

450 and 850 Foam Series

- Ideal for housewide, general purpose monitoring providing cost savings through standardization
- Provides quality traces up to 45 days after pouch is opened
- 850 Series is radiolucent to minimize the need to remove electrodes during x-ray
- Available in bulk or packs of 3 or 5
- Thin conformable foam substrate
- Rectangular shape 1 3/8" X 1 7/8"

450 Series
Non-radiolucent

850 Series
Radiolucent

	Reorder Number	Description	Quantity/Pack	Quantity/Case*
Non-Radiolucent Electrodes	22450	450	50	1000
	22453	453	3	600

Radiolucent Electrodes	22850	850	50	1000
	22853	853	3	600
	22855	855	5	600

*Product sold in case quantities only.

530 Foam Series

Diaphoretic ECG Electrode

- Designed for superior performance in stress and holter applications
- Highly aggressive adhesive
- Available in bulk and packs of three or five electrodes
- Tear drop shape 1 3/4" in diameter

530 Series
Non-radiolucent

Reorder Number	Description	Quantity/Pack	Quantity/Carton	Quantity/Case*
31013926	530	30	-	600
31115796	533	3	60	600
31115788	535	5	60	600

7300 Foam Series

- Electrode liner may be used as skin abrader
- Resealable bulk pack
- Square shape 1 3/4" X 1 3/4"

Reorder Number	Description	Quantity/Pack	Quantity/Carton	Quantity/Case*
50007305	7305	50/resealable pack	-	600
50007361	7361	1	150	600

50007365	7365	5	150	600

7300 Series
Non-radiolucent

*Product sold in case quantities only.

200 and 600 Foam Series

Cost-effective, general monitoring ECG electrodes

- Smaller size for convenient lead placement
- Available in bulk and packs of three or five electrodes
- 600 Series is radiolucent to minimize the need to remove electrodes during x-ray
- Tear drop shape 1 1/2" diameter

200 Series
Non-radiolucent

600 Series
Radiolucent

	Reorder Number	Description	Quantity/Pack	Quantity/Case*

Diagnostic

COVIDIEN OFFERS A VARIETY OF TAB ELECTRODE DESIGNS TO ACCOMMODATE VIRTUALLY ALL RESTING ECG APPLICATIONS.

- Conductive adhesive hydrogel for excellent adhesion and clear, reliable tracings
- Silver/Silver Chloride (Ag/AgCl) sensing system is defibrillation recoverable
- Variety of shapes, sizes and substrates to accommodate different skin types and applications
- Latex free, DEHP free, mercury free

THE #1 RESTING ECG ELECTRODE SOLD IN THE MARKET

5400 Resting ECG Tab

The 5400 sets the industry standard for resting ECG tab electrodes. This tab electrode features our most popular level of adhesion suitable for most diagnostic applications.

Gold 5500 Resting ECG Tab

The 5500 tab electrode features our highest tack adhesive gel providing maximum adhesion.

Reorder Number	Description	Quantity/Pack	Quantity/Carton	Quantity/Case*
31433538	5400	100	1000	4000
30807732	5500	100	—	2000

*Product sold in case quantities only.

Additional Resting ECG Tab Electrodes

Available in four specialized designs to further address user preferences.

	Reorder Number	Description	Quantity/Pack	Quantity/Pack	Quantity/Case*
	ET88110	CA210	100	1000	4000
		CA210 offers a unique, foam substrate design for long term and serial ECG's			
	EF00066	CA310	100	1000	4000
		CA310 is a smaller size with rounded corners			
	EF00149	CA510	100	1000	4000
		CA510 provides a larger adhesive surface area			
	31447793	CA610	100	1000	4000
		CA610 offers a distinctive shape and a broader tab			

100 Foam Electrode Series

The 100 Foam Series is an excellent choice for diagnostic ECG applications when a snap design is preferred.

- Small size is ideal for resting ECG applications
- Tear drop shape 1 3/16" diameter

100 Series Non-radiolucent

Reorder Number	Description	Quantity/Pack	Quantity/Case*
31118733	100	100	1000
31112496	130	30	600

*Product sold in case quantities only.

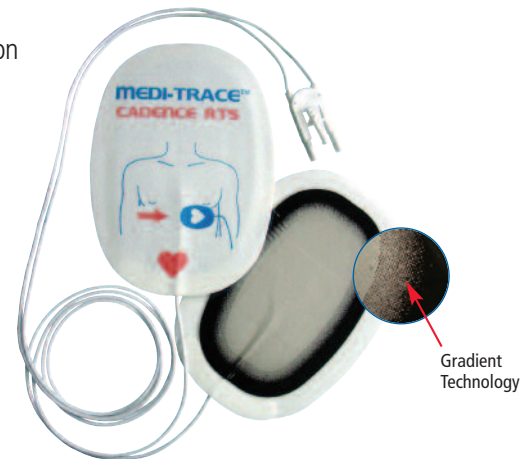

Defibrillation

MEDI-TRACE™ CADENCE AN INNOVATIVE DESIGN IN MULTIFUNCTION DEFIBRILLATION ELECTRODES

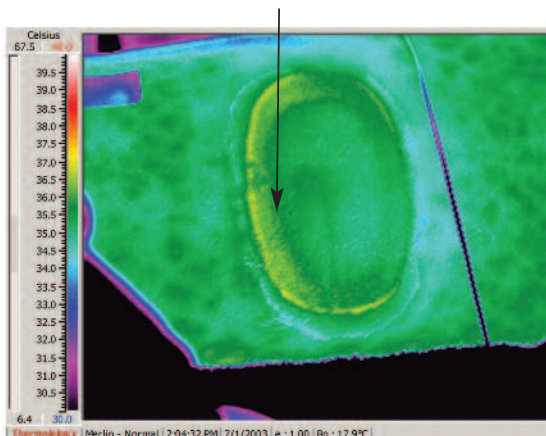

- Gradient technology combined with an oval shape reduces the risk of skin irritation
- Radiotransparency of pads and wires
- Extended leadwire length
- Aggressive conductive hydrogel maximizes adhesion and electrical contact
- Complete line of adult, pediatric and RTS products
- Connects directly to defibrillator cables; no adapters or cable manipulation required
- Latex free, DEHP free, mercury free

Thermogram Comparisons

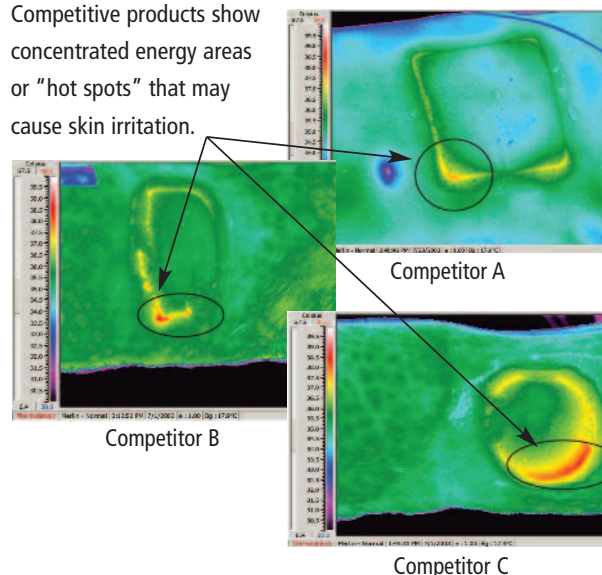

A gradient technology is applied to the silver/silver chloride (Ag/AgCl) composition of Medi-Trace™ Cadence electrodes resulting in a more uniform distribution of current under the electrode during use.

Medi-Trace™ Cadence electrodes clearly illustrate the benefit of a more uniform distribution of current.

Medi-Trace Cadence

Competitive products show concentrated energy areas or "hot spots" that may cause skin irritation.

* Thermograms were taken 3.60 seconds after defibrillation using a biphasic defibrillator

Medi-Trace™ Cadence Defibrillation Electrodes

- All packaging is color coded and contains connector illustrations to allow for quick and easy identification of product

- Medi-Trace™ Cadence-PC Electrodes allow clinicians to pre-connect directly to the defibrillator prior to use

Physio-Control

ZOLL

Neonatal

PRE-WIRED NEONATAL ELECTRODES

- Conductive adhesive hydrogel provides firm adhesion while minimizing irritation to delicate newborn skin
- Color coded leadwires with the industry standard .060" (1.5mm) safety socket connector
- Radiolucent leadwires available to minimize the need to remove electrodes during x-ray procedures
- Variety of shapes, sizes and substrates to address most neonatal patients
- Latex free, DEHP free, mercury free

Pre-Wired Clear Tape Series

- Clear tape substrate is comfortable, allows visibility to skin, does not absorb fluids, and slows hydrogel moisture loss under warming lights
- 24" leadwire length
- 5 lead version with 40" leadwires
- Two shapes
 - Round 1" diameter
 - Square 1" X 1 1/4"

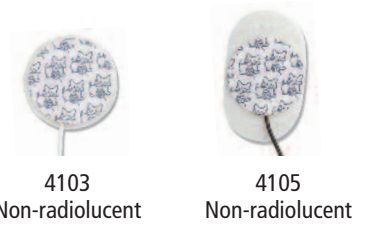

Reorder Number	Description	Quantity/Pack	Quantity/Case*
