

# DropSafe<sup>®</sup>

## Safety Pen Needles

*Intelligent design with viewing window for easy priming, while improving patient comfort.<sup>1</sup>*

**You can maintain a high standard of safety, efficacy, and comfort for clinicians and patients with DropSafe<sup>®</sup>.**

- Improve patient comfort with the first 31G safety pen needle available in North America, DropSafe 31G.\*
- In a simulated clinical study evaluating the safety and performance of DropSafe in 540 end-to-end patient usage trials, no failures were observed and no needle stick injuries occurred.<sup>2</sup>
- Prevent accidental needle sticks with DropSafe's patient end needle shield. It is recommended to cover back-end with outer cap & dispose. Put the outer cap on the needle back-end.<sup>3</sup>
- See the needle tip clearly during priming with DropSafe's needle viewing window.<sup>1</sup>

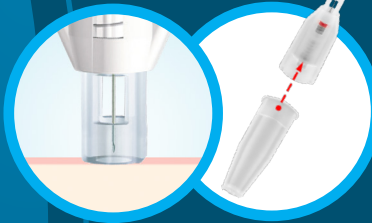

# DropSafe®

safety pen needles

### Needle Viewing Window

Clear, unobstructed visibility to needle tip during priming allows caregiver to see the droplet of primed drug.<sup>1</sup>

### Thoughtful Safety Design

A needle shield prevents accidental needle sticks at the patient end. It is recommended to cover back-end with outer cap & dispose. Put the outer cap on the needle back-end.<sup>3</sup>

### Unique In-house Lubrication

Droplicon™ needle lubrication designed for smooth injection.

### Needle Lock-out Confirmation

Needle is automatically locked after use to prevent re-use. Red stripes appear to confirm needle has been used and is ready to be disposed of safely.<sup>2</sup>
