

Tilt & Positioning Wheelchairs

Shown with 6" Multi-Directional Locking Rear Casters, and long armrests options

Tilt-in-Space functionality allows easy repositioning of users

Removable armrests make transfers safer for caregivers and patients

Posterior Tilt effectively opens the diaphragm improving digestion, oxygenation, and organ function

Patient, Facility, & Caregiver Benefits

- Facilitates positioning for comfort and respiratory function
- Tilt and recline provides ease of use for frequent re-positioning
- Proper seating alignment decreases postural deviations

Comfort Tension Seating[®] increases support and sitting tolerance

**Industry-leading Positioning,
Versatility, and Functionality**
