## Cane Height

See picture at right:

- Standard-height wooden canes (5180A, 5181A, 5182A, 5183A, 5185W and 5185BL) are designed for users up to 6'2" tall and up to 250 lbs. in weight.
- The extra long wooden cane (5184A) is designed for users over 6'2" tall and up to 250 lbs. in weight.
- The bariatric cane (5186B) is designed for users up to 500 lbs. in weight.
- Please consult a healthcare professional for the appropriate cane height.

## Adjust Cane Height

Before using, your cane may be cut to the appropriate height by an authorized Lumex dealer. Please consult a healthcare professional for the appropriate cane height. To cut cane to proper height:

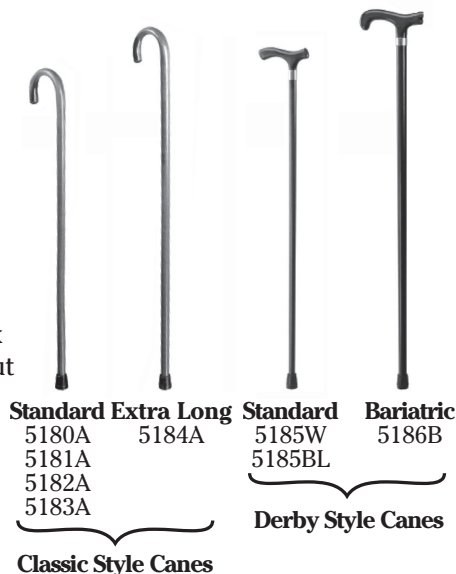

1. Remove the tip which covers the end.
2. Cut the end of the cane at the appropriate height for the user.
3. Ensure that cut is flat and smooth, so that cane end will rest in a stable position when in contact with the floor.
4. Install cane tip onto end of cane.

⚠ **Warning:** Before use, ensure that cane tip is properly seated and straight.

## Maintenance

- Wipe cane weekly with a damp cloth.
- Never use abrasive cleansers or scouring pads on any part of cane.
- Replace cane tips as needed. To guarantee the best service from your Wood Cane, always specify Lumex replacement parts. They are available from your Lumex dealer.

**Warranty**      Lifetime limited warranty. For additional warranty information, please contact your Lumex dealer.
