## CONNECT TO POWER AND TURN ON

Place Sofia 2 on the counter top within reach of an electrical outlet. The unit is portable and can be moved to a suitable location for testing.

1

Plug the Power Adapter into the power port on the rear panel of Sofia 2 and appropriate electrical outlet.

2

Turn Sofia 2 on using the power switch located on the rear panel. A Power On Self-Test screen will appear on the front display when Sofia 2 is turned on.

## ENTER ZIP CODE

When prompted, enter the ZIP Code where Sofia 2 is located and select ✓ to confirm. Sofia 2 will then advance to the Run Test screen.

## TEST VIRENA CONNECTION

From the Main Menu, select **Send Data**. Then select **Test connection** and press  to test the Virena connection.

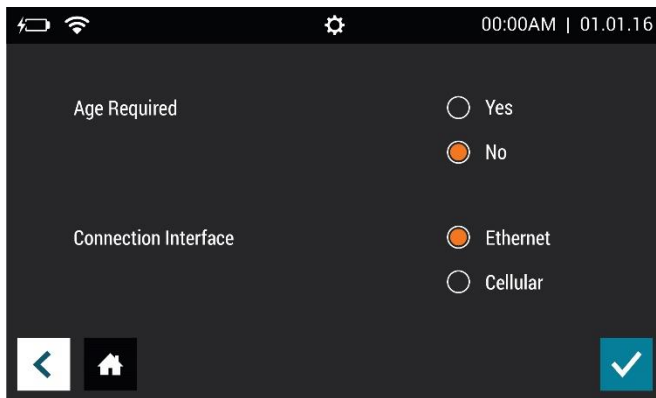

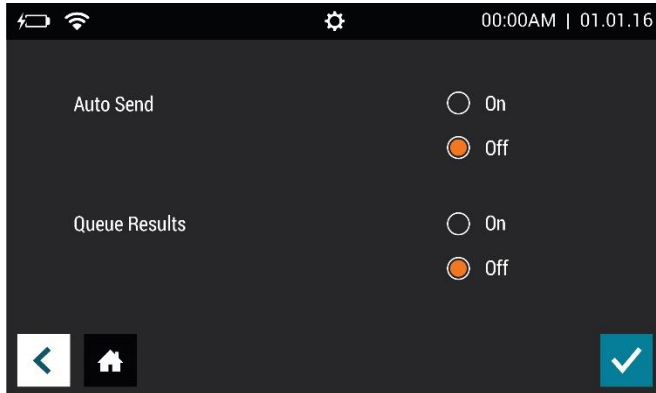

If the connection is successful, the message **Test connection success. Signal strength -##dBm.** will appear. Sofia 2 is now connected to Virena. If the connection is unsuccessful, contact Technical Support.

Continue to **Run Calibration**.

## CUSTOMERS WITHOUT VIRENA ACTIVATED

For Sofia 2 customers without Virena activated, testing the connection will result in the message **Send To Virena Error. Unable to Acquire Cellular Connection.** or the Test Connection pop up window could continue for several minutes requiring the user to restart the instrument. To prevent this message from reappearing, select **Supervisor Menu** from the Main Menu. Then select **Network Settings**, then **Virena Settings**. Configure settings to the following:

Press  to confirm changes and return to the Run Test screen.

## RUN CALIBRATION

- ▶ Enter the default Supervisor ID of 1234.
- ▶ Remove Calibration Cassette from the pouch.
- ▶ Press ▶ to advance to the next screen.

Following the prompts, insert the Calibration Cassette into Sofia 2 and gently close the drawer. Sofia 2 will perform the Calibration Check automatically.

The Sofia 2 display will indicate when the Calibration Check is completed.

**NOTE:** If Calibration Check cannot be completed successfully, notify the on-site Supervisor or contact Quidel Technical Support for assistance.

Once calibration is complete, remove and return Calibration Cassette to the storage pouch.

**Important:** Store the Calibration Cassette in the provided storage pouch between uses. Avoid touching the read window on the Calibration Cassette.

**Run QC according to assay specific Package Insert.**
