## TERUMO SHARPNESS SUPERIORITY VS COMPETITORS

† Hypodermic needles with and without vial penetration; allergy and insulin syringes with vial penetration.

## STANDARDIZATION IS KEY

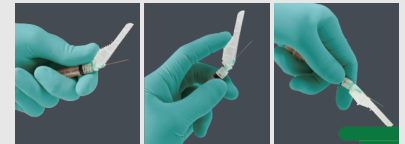

Products from different hypodermic manufacturers can be consolidated into one standard, easy-to-use product.

## VERSATILITY

Most syringes can be activated two ways but **SurGuard®3** has

**3**

Thumb, finger or hard surface

**SurGuard®3's double-bevel design** allows the needle to penetrate skin with less force, which could mean **greater comfort to patients\***.

**62.2%**  
of needle stick injuries  
are due to discarded unprotected sharps\*
