

TECHNICAL DATA SHEET

Transparent Dressing

Intended Use

Sterile transparent adhesive dressings consisting of a plastic strip coated on one side with an adhesive. This device is used in health care facilities to protect wounds from the introduction of bacteria and contaminants, in the treatment of skin tears, cuts and abrasions, and to secure object to the skin such as IV lines. Conforms to areas that are often difficult to dress, allows observation of the wound at all times, water and fluid resistant. Latex free.

Characteristic		Specification	
Material Composition	Backing Plastic Film	Polyethylene	
	Substrate	Transparent Polyurethane	
	Adhesive	Acrylic glue
